## Summary

Implementation Engineer with 5+ years of experience delivering customer-facing integrations, onboarding enterprise clients, and building reliable backend systems for SaaS platforms. Strong at translating ambiguous business requirements into scalable technical solutions, partnering with customer success and product teams, and driving fast, low-friction go-lives.

## Experience

### Easyship

#### Backend Engineer

July 2025 - Present

Bangalore

- Built a fault-tolerant service orchestrating integrations with external Warehouse Management Systems (WMS), handling retries and idempotency.
- Contributed to core rate-calculation services used across the platform, ensuring correctness and performance under variable courier rules.

Tech Stack - Ruby on Rails, Postgres, GCP

### Procol

#### Senior Software Developer

Jan 2023 - Jun 2025

Gurugram

- Owned the integrations platform and architecture, enabling **8 clients to go live within 3 quarters**
- Partnered with customer-facing teams to **translate ambiguous requirements** into scalable integration solutions.
- Led core product team of 10 owning the auction engine, improving platform reliability and contributing to a **10% increase in NPS and CSAT**.
- Authored integration documentation and technical guides, **reducing client-facing support and engineering communication by 30%**.

Tech Stack - Ruby on Rails, Go, Postgres, Redis, AWS, GitHub Actions

### Samudai

#### Lead Backend Engineer

Jan 2022 - Jan 2023

Dubai

- First engineering hire; designed backend architecture and integration patterns to support early customers and rapid iteration.
- Integrated multiple third-party platforms** (Discord, Notion) to enable composable workflows and external extensibility.
- Owned backend systems end-to-end, including service design, deployment, monitoring, and production reliability.
- Built and shipped core platform features such as **Search, Access Control, Page Visit Analytics, and Project Management**.
- Implemented **CI/CD pipelines** and DevOps workflows to enable faster, safer deployments with minimal downtime.

Tech Stack - Go, Docker, Kubernetes, Postgres, MongoDB, GitHub Actions, DigitalOcean, Node, Typescript

### Touchnote

#### Backend Developer

Jun 2021 - May 2022

Hyderabad

- Led a **zero-downtime refactor** and upgrade of Go microservices, completing the migration **within 4 weeks**.
- Ideated and developed "Refer a Friend" feature which **increased user signups by 5%**.
- Optimised gateway and **reduced response time to ~250ms** in micro-service architecture.
- Developed product sense through weekly mentorship from Product Manager and contributed to roadmap development.

Tech Stack - Go, Docker, Kubernetes, Postgres, Circle-CI

### Tredence Analytics

#### Software Engineer

Aug 2020 - May 2021

Bangalore

- Built scalable data pipelines** to process large historical datasets and generate 5-year sales forecasts.
- Developed Spark-based frameworks to ingest and normalize heterogeneous data formats into business-consumable standards.

Tech Stack - Python, Azure, Spark SQL, Alteryx

### Independent Consulting

July 2018 - April 2021

- Served multiple clients across cloud engineering, analytics, and application development.
- Built and deployed admin analytics dashboards for a logistics client.
- Migrated an A/B testing SDK** from JavaScript to Go.
- Helped a food & beverage client rapidly develop a hybrid app using React Native.

Tech Stack - Go, React-native, PHP, mySQL, Firebase

## Skills

- Programming Languages:** Ruby, Go, Python, javascript
- Tools & Technologies:** Git, Ruby on Rails, GitHub Actions, Docker, Kubernetes, DigitalOcean, AWS
- Databases:** Postgres, Redis, MongoDB, ElasticSearch

## Education

Vellore Institute of Technology, Vellore - B.Tech

(2016-2020) - 8.6 CGPA
